

Enhancing Wi-Fi Coverage at Ryder Systems Inc.

Ryder System, Inc. is an American transportation and logistics company, specializing in truck rental and leasing, fleet management, supply chain management, and transportation management. Ryder has approximately 4500 locations across North America.

PROJECT SCOPE

29 Office and Warehouse locations across North America required cabling upgrades and Access Point replacements as the current model was end of life.

The minimum installation per facility was 12 access points with a maximum of 54.

Post installation site survey testing and reporting was required.

SOLUTION PROVIDED

The overall solution involved switch replacements as well as replacement of old Aerohive AP's to new Mist Access Points.

Cat5 Cable was replaced with Cat6 cabling, patching, terminating and testing were also provide along with a final site survey and report.

AT A GLANCE

Challenges

End of life Aerohive AP's to be replaced within offices and warehouse locations across North America

Benefits

- Better Overall Coverage
- Upgrade to Cat6 Cabling
- Fewer stoppages for Robotics
- Decreased maintenance & AP troubleshooting

"For over 15 years GT Global Services have been our go to installation partner.

Their experienced technicians are excellent in what they do .We have found them to be both efficient and affordable".
